## MATERIALS

Frosted Paper Pack—Stone Fruit  
Cardstock—Jellybean Green  
Bearly Art Precision Craft Glue

The tools & materials can be found at [FELTPAPERSCISSORS.com](http://FELTPAPERSCISSORS.com)

① Gather your tools and materials.

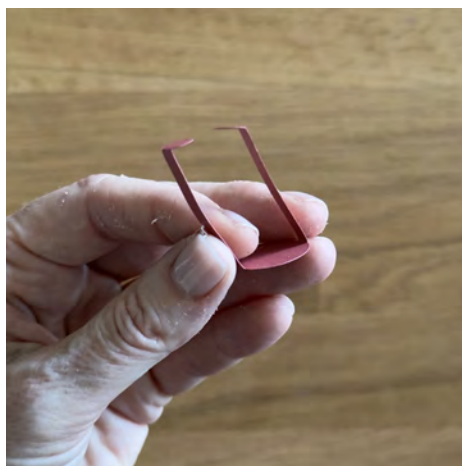

② If you are using a cutting machine, you will need a fine point blade and scoring tool.

③ Cut and score your piece according to the template.

4 You can cut small or large pumpkins from each of the paper colors.

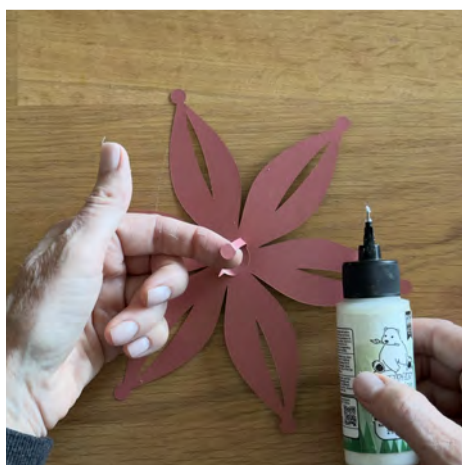

5 Fold the inner brace at the edge of all three circle shapes.

6 Add glue to the base of the larger circle.

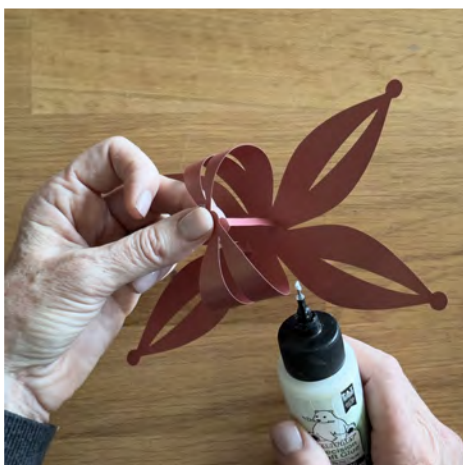

7 Place it onto the center of the pumpkin shape.

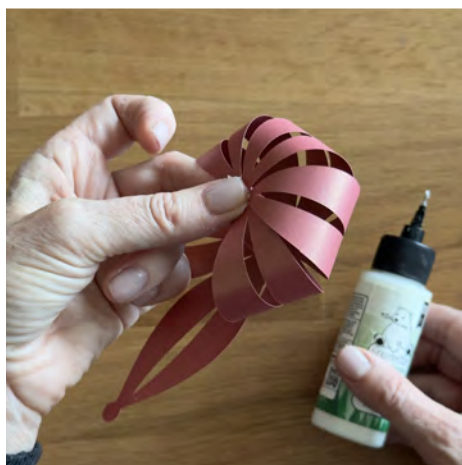

8 Glue the two smaller circles, one on top of the other. Allow the center brace time to dry.

9 Glue one of the small circles onto the center circle, looping the paper.

10 Glue the second, pressing to seal the paper.

11 Glue all but one of the circles, shaping the pumpkin and pressing the glue to seal each layer.

12 Place the last circle onto the center.

13 Press the stack of circles to the base to seal them all into place.

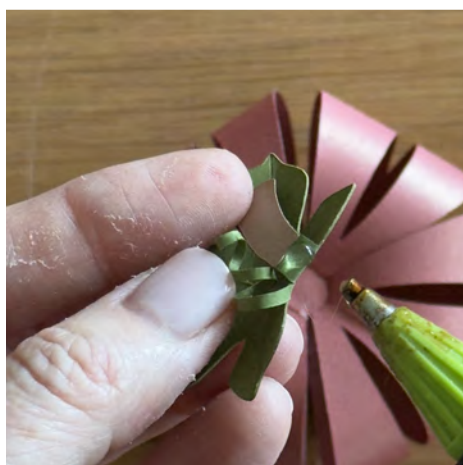

14 Glue the frosted stems onto both sides of the cardstock stem.

15 Twist the thin strip around a scoring stylus or thin pointed tool to create a spiral.

16 Fold the leaves along the scored lines to shape.

17 Place a dot of hot glue onto the top of the pumpkin.

18 Set the stem combo onto the hot glue dot.

19 Repeat these steps for all of your frosted paper pumpkins.
